

Chapter 6 – Face, mouth, salivary and thyroid

Fees for the removal of roots should not be charged in conjunction with fees for the removal of impacted teeth.

When bone grafting is used as part of the treatment of a bone cyst, this should not be charged as a separate procedure. Specifically, the code for alveolar bone grafting is not appropriate for use in these circumstances.

Fees for the closure of an oro-antral fistula should not be charged in conjunction with fees for the removal of impacted teeth/complex buried roots.
