

Chapter 5 – Ear, nose and throat

A septorhinoplasty is only covered when it relates to restoration of a patient’s normal appearance immediately following trauma or the excision of a tumour. The presence of a nasal obstruction does not automatically mean a septorhinoplasty will be covered and all such procedures must be preauthorised.

The code for the Uvulopalatoplasty procedure is not included in our schedule of fees and is not eligible under any circumstances for the treatment of sleep apnoea.

Functional endoscopic sinus surgery (FESS) includes the removal of nasal polyps, antrostomy and turbinate reduction and these should not be charged as additional procedures.

Any codes designed for use in theatre should not be used in an outpatient setting – for example, nasal cautery or the removal of a foreign body from the nose.

Fees for packing of the nose should not be charged as additional procedures.

The code for the Epley manoeuvre is for use by specialists only. Where a patient has an appointment specifically for the Epley manoeuvre we do not expect to receive a consultation charge as well. In addition, we should not receive any charges from facilities for this service unless billing on behalf of the specialist.
